**NOTES:**

**It's important to note that SAFETY is our prime concern therefore we strongly recommend.**

1. **ALWAYS BEGIN LOADING AT THE RECOMMENDED MINIMUM "START" LOAD and develop loads in 2% increments towards the MAXIMUM load.**

2. **CAUTION: Beware of double charging if the loading density is below 50% of the available volume.**

**Examples:**

➤ **Most Handgun caliber/powder combinations as well as**

➤ **A-5744 with reduced loads for rifles.**

3. **If possible, measure the velocity and correlate with our data.**
