**NOTES:**

**It' important to note that SAFETY is our prime concern therefore we strongly recommend.**

1. **ALWAYS BEGIN LOADING AT THE RECOMMENDED MINIMUM “START” LOAD and develop loads in 2% increments towards the MAXIMUM load.**
2. **CAUTION: Beware of double charging if the loading density is below 50% of the available volume.**

**Examples:**

- **Most Handgun caliber/powder combinations as well as**
  - **A-5744 with reduced loads for rifles.**
3. **If possible, measure the velocity and correlate with our data.**
