

Blackhorn Loads for the Remington Ultimate Muzzleloader

These loads were created to match the published velocities of a 4 pellet load in a Remington Ultimate Muzzleloader. They are not intended for use in other muzzleloaders. These pressures were found to be safe in our rifle, but approach all loads with caution.

250 gr. Barnes Spitfire TMZ

150 grains by volume 2,476 feet-per-second

300 gr. Barnes expander MZ

150 grains by volume 2,371 feet-per-second

325 gr. Parker Match Hunter

150 grains by volume 2,341 feet-per-second
